

Houdaifa Mouden

Full Stack Developer

I am a 20-year-old Full-Stack Developer student at ISTA Tetouan in my second year of studies. Passionate about new technologies, I have worked on several academic IT projects, which allowed me to develop my skills in both front-end and back-end development. Motivated and eager to learn, I aim to contribute effectively to innovative projects during a pre-employment internship.

EXTRACURRICULAR ACTIVITIES

Member of the Computer Science Club at ISTA Tetouan, participating in workshops and coding challenges.

Volunteered in tech events and hackathons, collaborating with students on practical projects.

Continuous self-learning in web and software development through online courses and personal projects.

ACADEMIC PROJECTS

Project: Sports Terrain Reservation Application

Allows users to create accounts, log in, and book courts for various sports with an interactive calendar. Users can view, filter, and cancel their bookings while enjoying a secure and role-based experience.

Technologies: HTML, CSS, JavaScript, PHP, MySQL

Project: Product List

Developed a web application to browse products, add favorites to a cart, manage orders, and confirm purchases. Implemented a clear, responsive, and interactive interface to enhance the shopping experience for users.

Technologies: HTML, CSS, JavaScript

Project: Weather Web Application

Developed a web application that allows users to get real-time weather information for any location using a weather API. Features include searching cities, displaying temperature, humidity, and conditions with a responsive and user-friendly interface.

Technologies: JavaScript, HTML, CSS, Weather API

Project: Desktop Password Generator Application

Developed a desktop application that allows users to generate secure passwords and manage them efficiently. Features include password creation with customizable criteria and storage in a database for easy retrieval.

Technologies: Python, Qt Designer, MySQL
